ANGULAR FRONT-END DEVELOPER

I am a 21-year-old Angular Developer seeking opportunities in web development. I completed my studies at IT Step Academy in May 2024 and am actively looking for ways to further develop my programming skills with both business and personal projects.

KEY COMPETENCIES

Creating responsive Single-Page Applications using the Angular framework.

Proficient in using GitHub for version control and seamless merges. Experienced with Netlify for deploying applications.

Incorporating Firebase or other databases, setting up email verification for security.

EDUCATION

IT Step Academy

Nov 2023 - May 2024

Angular Front-End Development

- Key Angular Concepts: Mastered basics of dependency injection, RxJS, reactive forms, standalone components, and directives.
- Database Integration: Incorporating Firebase or other databases, setting up email verification for security.
- Version Control: Proficient in using GitHub for version control and seamless merges. Experienced with Netlify for deploying applications.

GeoLab & Academia Europaea Tbilisi Knowledge Hub

Jul 2022 - Aug 2022

Front-End Web Development

- HTML: Learned nearly every commonly used tag and syntax, embedded multimedia elements, created links, and used semantic HTML for improved accessibility.
- CSS: Mastered the use of classes and IDs to group and style elements efficiently, applied various styles (colors, fonts, layouts), and used advanced techniques like Flexbox and Grid for responsive design.
- CSS Animations: Gained experience with CSS animations and transitions to enhance user experience.

SKILLS

Languages:

JavaScript, TypeScript

Frameworks & Libraries:

Angular, Bootstrap, EmailJS

Tools:

GitHub, Netlify, Firestore
