ANGULAR FRONT-END DEVELOPER

I am a 20-year-old Junior Angular Front-end Developer seeking opportunities in web development. I completed my studies at IT Step Academy in May 2024 and am currently in my junior year at Caucasus University, majoring in European Studies.

KEY COMPETENCIES

Angular Development: Creating responsive Single-Page Applications using the Angular framework.

Version Control: Proficient in using GitHub for version control and seamless merges. Experienced with Netlify for deploying applications.

Database Integration: Incorporating Firebase or other databases, setting up email verification for security.

EXPERIENCE

GeoLab & Academia Europaea Tbilisi Knowledge Hub

Jul 2022 - Aug 2022

Front-End Web Development

- **HTML & CSS:** Gained a solid understanding of the basics of HTML and CSS, essential for front-end development.
- **HTML:** Learned nearly every commonly used tag and syntax, embedded multimedia elements, created links, and used semantic HTML for improved accessibility.
- **CSS:** Mastered the use of classes and IDs to group and style elements efficiently, applied various styles (colors, fonts, layouts), and used advanced techniques like Flexbox and Grid for responsive design.
- **CSS Animations:** Gained experience with CSS animations and transitions to enhance user experience.

IT Step Academy

Nov 2023 - May 2024

Angular Front-End Development

- **Angular Development:** Creating responsive Single-Page Applications using the Angular framework.
 - **Key Angular Concepts:** Mastered dependency injection, RxJS, reactive forms, standalone components, and directives.
 - **Database Integration:** Incorporating Firebase or other databases, setting up email verification for security.
 - **Version Control:** Proficient in using GitHub for version control and seamless merges. Experienced with Netlify for deploying applications.
-
